MEMBER, Technical Team | May 2022 – Present

Our Team is a harmonious blend of programmers , developers , networking enthusiasts , and many more.

We organize **Tech Fest** , manage **Technical aspects** of UIT , In charge of building strong **Coding Community** at UIT

PROJECTS :

Tech Fest Website - Frontend and Backend Development

Tech Stack: React js , Node js , Express js , Tailwind css , Mongodb , Javascript

- Frontend: Developed with React.js to create interactive and responsive user interfaces, allowing users to browse products, manage their cart, and access their dashboard with ease.
- Backend: Utilizes API endpoints in Express.js to fetch and deliver product data from the database to the frontend.

[\[Link\]](#) **Ecommerce Website** - Frontend and Backend Development

Tech Stack: React js , Node js , Express js , Tailwind css , Mongodb , Javascript

- Frontend: Developed with React.js to create interactive and responsive user interfaces, allowing users to browse products, manage their cart, and access their dashboard with ease.
- Backend: Utilizes API endpoints in Express.js to fetch and deliver product data from the database to the frontend.

[\[Link\]](#) **Twitter Clone** - Frontend and Backend Development

Tech Stack: React js , Node js , Express js , Tailwind css , Mongodb , Javascript ,Firebase

- Frontend: React.js used for building a dynamic and responsive user interface, allowing users to sign in or log in using Google or email, tweet, view others' tweets, and manage their profiles.
 - Backend: Node.js & Express.js handle server-side logic and API routes, managing user authentication with Firebase, processing tweets, and updating user profiles. They also handle requests for deleting tweets and updating user data.
